

On a mission to support open source

At Flossbank, we help pay open source authors and maintainers for their work. Our mission isn't unique. Our approach is.

[For Developers](#)

WHY FLOSSBANK

The best way to support open source

We use ad revenue and monthly donations to support all the maintainers of the packages you install.

Our no-cost option means everyone can support open source maintainers

We give across the entire dependency tree, supporting maintainers big and small

Flossbank doesn't change your existing workflow

Your donations go directly to the packages you use

[About Us](#)

FOR DEVELOPERS

Give back to maintainers across your entire dependency tree

Flossbank provides a **free and frictionless way** to give back to open source maintainers, especially those who don't have time for self promotion.

By installing our CLI, you support maintainers across the entire dependency tree of your installed packages in one of two ways: terminal ads or monthly contributions.

Are you an author or maintainer? [Sign up](#) for our beta list.

SUPPORT MAINTAINERS AT NO COST

Opt into curated, tech-focused ads in your terminal when you install open source packages

OR SET A MONTHLY CONTRIBUTION

Donate monthly to the developers and maintainers of the open source packages you install

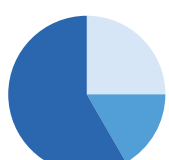

FOR BUSINESSES

Equitable contributions to the open source ecosystem

By registering your GitHub Enterprise account with Flossbank, you can give to authors and maintainers across the **entire dependency tree** of your installed packages.

Rest easy knowing 100% of your donation goes to authors and maintainers

Donate dynamically to the open source packages your firm uses most

Gain insight into your impact and explore advertising opportunities
